

ALL ABOUT SHADE

ALL YEAR ROUND PROTECTION

Safe shade that makes
the most of apartment
living.

Balcony blinds
designed and
engineered for
apartment living.

Certified Safety.
Architecturally Loved.
Life Expanded.

Unlock your balcony’s full potential with Australia’s only safe shade option for apartments living.

Reclaim your balcony with Vistaweave 95 mesh and Ziptrak® - Australia's safest balcony blind system. It's the easiest way to install compliant external blinds, effortlessly connecting your indoor and outdoor areas and transforming your balcony into a functional, year-round living space.

Uniquely certified to meet the highest safety standards of the National Construction Code (NCC), our balcony blinds eliminate worries about non-compliance, insurance issues*, and disputes with Body Corporates.

This solution is ideal for applications across balconies and facades in multi-storey buildings, retirement villages, hospitals and any first-floor balconies requiring strata approval.

NCC Certified. Elevated lifestyle

For decades, Vistaweave mesh and Ziptrak® have set the benchmark for Australian exterior blinds. Now, they define the standard for apartment safety.

The pairing of Vistaweave 95 and Ziptrak® guided blind system has been certified by an independent Fire Engineer for use on multi-storey balconies.

This combination has been independently tested and certified to meet the stringent fire safety requirements of the National Construction Code (NCC).

Unlike non-compliant systems that pose a fire risk, Vistaweave 95 mesh safely shrivels and contracts without catching or spreading fire. Additionally, the non-combustible aluminum Ziptrak® frame doesn't contribute to fire spread or create dangerous falling debris.†

All season comfort, style and savings

External blinds are a clever way to make apartment balconies more energy-efficient by blocking the sun's heat and glare before it hits the glass. Blinds provide comfort and connection, keeping balconies cooler in summer and warmer in winter, making it easy to transform balconies into usable living spaces and reducing energy costs.

Uncompromised aesthetics

Our balcony blind system is meticulously engineered to enhance the aesthetic value of your building, not compromise it. Our system delivers the seamless visual consistency required by Body Corporates and architects.

It achieves this by offering a wide, curated palette that ensures total design control. Whether you need to perfectly match existing facades or meet the colour specifications of a new multi-storey development, our flexible range creates a superior, cohesive result that adds long-term property value.

Style your Way

The Vistaweave 95 mesh offers 37 sophisticated colourways, including 24 shades directly inspired by COLORBOND®. This curated palette guarantees a harmonious blend with existing balcony structures, guttering, and facades.

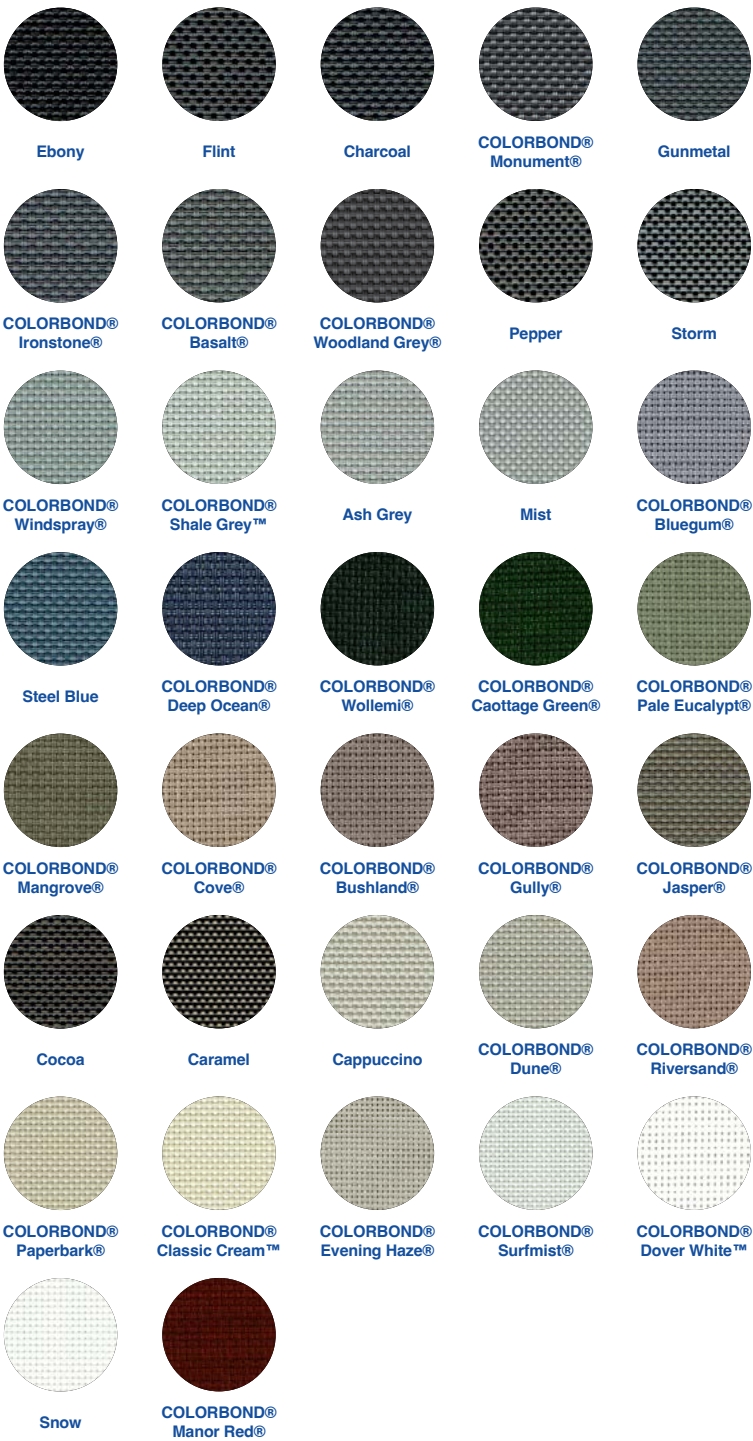

The Ziptrak® track system provides maximum design flexibility, available in 7 standard colours (including 5 of the most popular COLORBOND® shades). For perfect integration, tracks can be custom powder-coated to any colour specification, ensuring a seamless visual match with the building's architectural style.

Fabric Colourways

As Australia's largest mesh range inspired by COLORBOND® colours, it provides superior protection from the elements while preserving a clear, uninterrupted view. Now you can shield your space without compromising your architectural style.

Frame Choice

Ziptrak® outdoor blinds offer unmatched comfort, protection and ease of use. Designed for durability and effortless operation, the system redefines outdoor and indoor living.

Living elevated: engineered for the Australian lifestyle.

Backed by decades of trust, Vistaweave and Ziptrak® deliver the perfect mix of quality, flawless function, and lasting value, offering:

Flawless Architectural Integration

Custom-fitted screens that seamlessly align with your existing balcony structures, roofs, gutters, and architectural lines for a truly cohesive, premium finish.

True Lifestyle Expansion

Seamlessly transform exposed outdoor spaces into stylish, protected, and fully integrated living areas that nurture a stronger connection to your environment.

Uninterrupted Views & Natural Light

Maintain clarity and openness while managing heat and glare.

All-Season Use

Protection from sun, wind, and rain lets you enjoy your patio or balcony all year round.

Proven, Trusted Durability

Engineered for longevity, delivering reliable, long-lasting performance with market-leading UV filtration, weather resistance, and fade protection.

Complete Design Freedom

A curated palette of classic and contemporary colours and fabrics, ensuring the perfect finish to complement—or redefine—your building's aesthetic.

Fire-Safe Solution

Certifiable and certified peace of mind for owners, body corporates, architects, and designers.

National Construction Code Compliance

For ultimate peace of mind.

Frequently Asked Questions

Scan to download compliance documentation

Where can I install the external blinds?

This innovative solution is specifically designed to expand your installation options. It can now safely and compliantly be installed on balconies above ground level on any multi-storey building. With compliance taken care of, the Vistaweave 95 and Ziptrak® Outdoor Blind Solution is also ideal for schools, hospitals, and aged care facilities.

Can I change the mesh choice?

Only Vistaweave 95 Mesh, with its superior fire-retardant properties, has been tested and approved for this application. You can choose any of the 37 colours in the range.

Are my blinds insurable?

Yes. It's always recommended to review your specific insurance policy for cover details and consult with your insurance provider. Our solution includes all the necessary certification and fire testing documentation to provide your insurer.

Will it reduce approval timings with body corporate or local council planning?

Yes. We can provide copies of all required compliance documentation, including the IGNIS Letter, ISO 13785-1 2022 report, and the fire testing certificates for AS 1530.2 and 1503.3, which eliminates the need for individual certifier assessments, potentially reducing project timelines for builders, architects, and installers.

How can I acquire the compliance documentation?

Scan the QR above to download copies of all ISO, fire testing and compliance certificates.

Will I need to hire a crane to install the external blinds on my balcony?

No. A unique joiner system enables installers to transport the Ziptrak® blind components using an elevator or stairs and reassemble them on the desired floor. This eliminates the need for hiring a crane while still allowing you to install blinds up to 5m wide.

What did the ISO 13785-1:2022 fire testing confirm?

The tests showed that under intense heat, the Vistaweave 95 blind material shrivels without causing unacceptable flames to spread or falling debris, even without a balcony structure. Additionally, the Ziptrak® frame, made of non-combustible aluminium, and the remaining plastic parts did not contribute to unacceptable flame spread or falling debris.

Will it match my COLORBOND® exterior?

Yes. Both the Vistaweave 95 mesh and the Ziptrak® system come in a variety of colours, including COLORBOND®-inspired matches, ensuring a seamless and harmonious fit with your building's exterior.
